

Alan Pham

EXAMPLE ONLY. NO CLIENT DATA.

One rough follow-up rewrite

Input: one rough draft or a few bullets. Output: one cleaner email to paste and send.

Rough draft

hey checking in on the quote
not sure if now is still a good time
let me know if you want to talk
also ok if not

Follow-up to send

Subject: quick check
Quick check. Should I keep this open for next week, or close it out for now?

Why this is useful

ROUGH INPUT	CLEANER EMAIL DOES
"checking in"	Gets to the point immediately.
"not sure if now is good"	Removes the apologetic wording.
"let me know"	Asks for a clear next state.
"also ok if not"	Makes closing the thread easy.

Optional internal note

FIELD	VALUE
Outcome	One shorter email ready to send.
Next action	Paste and send the cleaner version.
Risk	Do not send private details in the example.

Alan turns one rough follow-up draft into one cleaner email to send. This example uses invented data.
